DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A reflective liquid crystal device according to the embodiment depicted in claim 1, a reflective liquid crystal device according to the embodiment depicted in claim 2, a transfective liquid crystal display device according to the embodiment depicted in claim 15, and a transfective liquid crystal display device according to the embodiment depicted in claim 16.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2812

The claims are deemed to correspond to the species listed above in the following manner:

First mentioned embodiment: claims 1, 3, 5, 7, 9, 11, 13, 33

Second mentioned embodiment: claims 2, 6, 8, 10, 12, 14, 34

Third mentioned embodiment: claims 15, 17, 19, 21, 23, 25, 27, 29, 31, 35

Fourth mentioned embodiment: claims 16, 20, 22, 24, 26, 28, 30, 32, 36

The following claim(s) are generic: none.

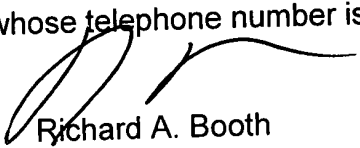

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: species 1-2 and species 3-4 claim different types of liquid crystal display devices, respectively, and species 1-2 as well as species 3-4 differ from each other in terms of the various parameters claimed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard A. Booth whose telephone number is 308-3446. The examiner can normally be reached on Monday-Thursday from 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Niebling can be reached on 308-3325. The fax phone numbers for the organization where this application or proceeding is assigned are 308-7724 for regular communications and 308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-1782.
